# Welcome

Welcome to the famous Argos catalogue. We have compiled this catalogue with you in mind, to offer you a great way of shopping for a huge range of quality products, at prices you will find hard to beat.

## How to shop

Shopping is simple-

- 1 Write the catalogue number and the quantity of the goods you require on a selection form (there are some included in this catalogue as well as in-store).
- 2 Take the form to a service point.
- 3 Whilst you are paying, your goods will be brought to the collection counter ready for you to collect. Some of our larger items can also be ordered by telephone and delivered to your door, please see page 3 for details.

## Ways to pay

You can pay for your purchase with cash or any one of the credit or debit cards shown. You can also pay by cheque and, if you have a valid cheque card, we will give you immediate clearance on cheques up to £500 (subject to status, you may need additional proof of identification).

**You can also pay by redeeming your Premier Points, see page 4.**

Overseas visitors may qualify for tax free shopping, saving at least 14% of the cost of your purchase. Please ask in-store for further details.

## Up to £1000 Instant Credit\*

Please ask in-store for details.

\*Subject to status. Available to most adults. Argos is a licensed credit broker.

## Argos Personal Account

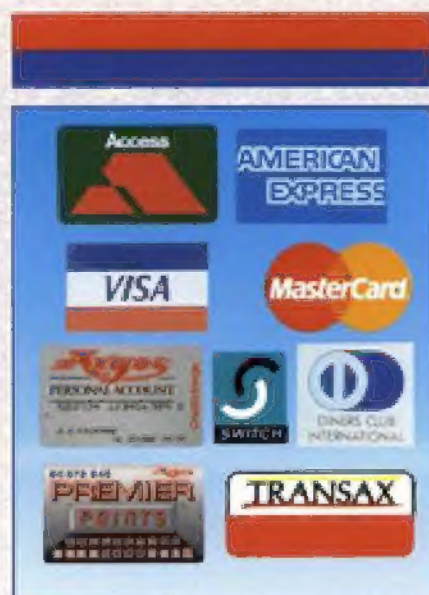

There's now more than ever to choose from at Argos. With our Personal Account you can afford what you want now and then spread your payments over time.

**Spread the cost with an Argos Personal Account.**

Please ask in-store for details.

## Free home delivery service

For your convenience, items which are too large or heavy to stock in our stores, will be delivered directly to your home free of charge, anywhere in Great Britain (including Northern Ireland). Look for this symbol in the catalogue.

Delivery normally within 14 days, unless otherwise indicated in the description of the items or at time of ordering.

Order by telephone, using our Argos Direct FREE Linkline number 0800 555899.

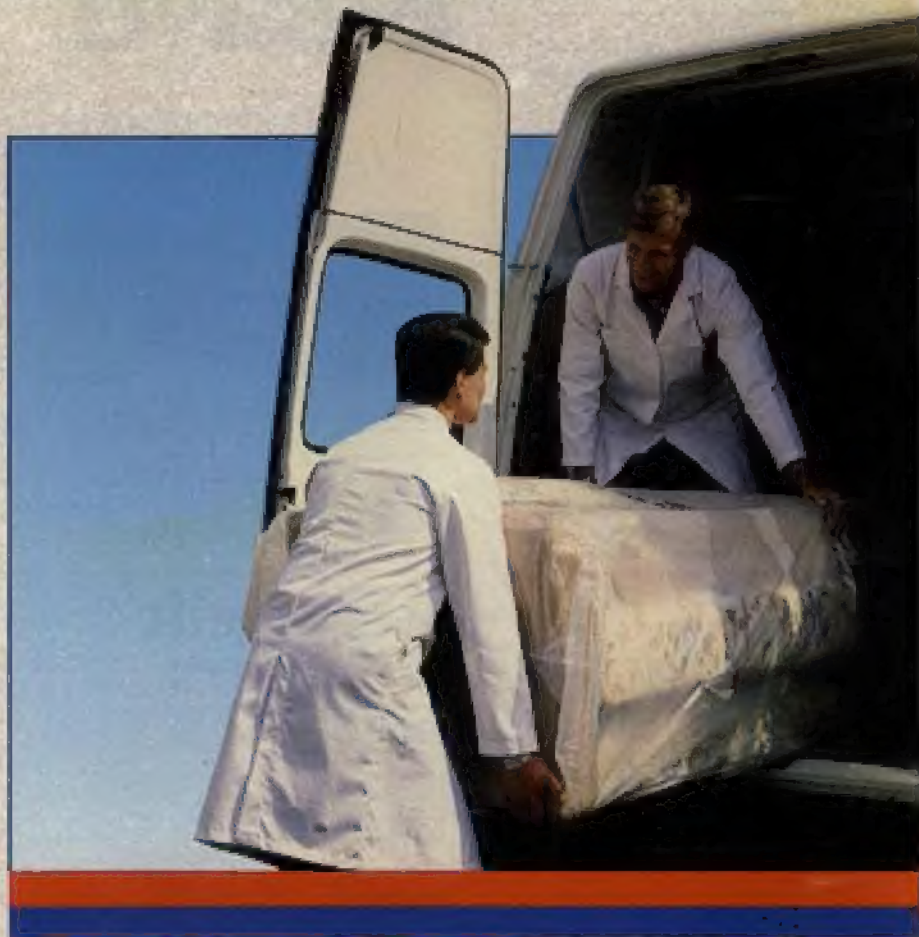

You can call 24 hours a day, 7 days a week, giving your name, address, telephone number and credit card details, along with the catalogue number and description of the item you wish to purchase.

As well as being able to order any Argos Direct item by telephone, you can also order at any Argos store.

All Argos stores have examples of materials used on these products, so now you can ensure that the item you order is exactly what you want.

Please note: The 0800 Linkline number can only be used for placing orders for items marked with the red lorry symbol. You will be given an alternative number when you order an item for any other queries.

## Superstore delivery service

Delivery to your door for a small charge, within a 20-mile radius of a Superstore.

In addition, if you live within 20 miles of an Argos Superstore, you can order any items and have them delivered to your door for a small charge\*.

You can order by telephone during normal working hours - just quoting your name, address, credit card number and item details and we'll take care of the rest. (See the back page of the catalogue for a list of Argos Superstores and telephone numbers.) Or, you can order in-store at your nearest Superstore.

\*Excluding items delivered FREE by our Argos Direct Service.

Free delivery and installation on large TV's and VCR's.

As an extension to our Superstore Delivery Service, we are also offering FREE DELIVERY AND INSTALLATION on all large screen televisions (20 inches and over) and VCR's, from any Argos Superstore.

Installation is to an existing electrical socket and adjacent aerial point. This offer applies within a 20 mile radius of any Superstore.

You can order at your nearest Superstore, or by telephone - as for our Superstore Delivery Service.

## Extended guarantees

■ Premier Points Collecting Cards  
are issued nationwide through  
the network of Mobil service stations.

■ Each time you buy petrol or  
diesel fuels, Points are  
accumulated on your personal  
electronic Collecting Card.

■ Points may be redeemed  
through any Argos store at any  
time - there is no need to wait until  
you have a full card. Simply present  
your Collecting Card(s) when making a  
purchase of one or more items from  
the Argos catalogue\*. You can add to  
your Points value with any other  
method of payment accepted at Argos  
stores.

For full terms and conditions pick up a  
leaflet at any Argos store or  
participating Mobil service station.

\*Excludes Flying Flowers, film  
processing, and any other mail order  
services.

If you want to take care of a Birthday,  
Anniversary or any other special  
occasion, an Argos Gift Voucher could  
be the answer.

Vouchers are also ideal for incentive  
and promotional programmes (see  
page 358).

Please note that, unfortunately, we  
cannot exchange Gift Vouchers for  
cash.

To reinforce the Argos policy of  
selling high quality products,  
we also offer 3 and 5 year Extended  
Guarantees on a range of electrical and  
household items from microwaves to  
televisions and midi systems to  
vacuum cleaners and cameras.

■ For a modest single payment you  
can insure yourself against  
possible repair costs after the  
manufacturer's guarantee has expired,  
and know that expert help is always  
available.

■ So when choosing your purchase,  
why not protect yourself for the  
future by taking out an Argos  
Extended Guarantee.

■ We are also offering **FREE FIRST  
YEAR ACCIDENTAL DAMAGE  
COVER** on a range of electrical items.

Pick up a leaflet in-store for details.

The above guarantees do not affect  
your statutory rights.

# Committed to quality & safety

We want you, our customer, to have total confidence that every item you purchase from Argos is **SAFE, RELIABLE** and of the highest **QUALITY**.

We have therefore developed a large Quality Control team, fully dedicated to fulfilling such requirements, and have many products tested at independent test laboratories. All our goods, especially nursery and toy products, are subject to strict safety regulations and we take every care to ensure that all our products are safe.

The lion mark is a symbol of toy safety and all Argos toys are tested for compliance with exactly the same approved safety standard.

The "CE" mark, which appears on all Argos toys, is part of a campaign by the EEC to improve safety standards across Europe.

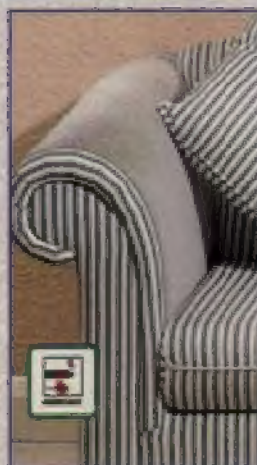

All our upholstered furniture conforms to match and cigarette ignition tests.

**Please Note:** Some of the goods which are shown in the catalogue may vary slightly if a supplier has changed or altered their specifications after the catalogue has been printed. If this should happen, we will try to help by offering you alternative goods of a similar specification and value to your original choice.

Under exceptional circumstances, we may have to make adjustments to our prices stated in the catalogue (which include VAT of 17.5%).

Please check the in-store catalogues before ordering.

All items are subject to availability.

The following guarantees do not affect your statutory rights.

## The Argos promise

If you change your mind and decide that a product you have bought does not meet your exact requirements we offer you the opportunity of returning it within 16 days of purchase, for a full refund or exchange.

We simply ask that it is returned in its original and unspoilt condition, with its original wrapping and your receipt. Please note this promise does not apply to earrings for pierced ears, food products, camcorders, pre-recorded music and videos or fresh flowers.

## After sales care

Making sure that you are happy with your purchases, both when you buy them, and when you have taken them home, is very important to us.

If a product develops a fault, simply return it within 30 days of purchase and we will offer you an exchange or a full refund.

If a fault develops and the product is returned to a store more than 30 days after purchase but within 12 months, we will provide a free-of-charge repair facility, normally within 16 days.

Any product which develops a fault and has a manufacturer's guarantee beyond 12 months will be repaired free of charge for the duration of that guarantee.

And don't forget that we can arrange to have many electrical appliances serviced in your home.

Argos supports the guidelines for guarantees set by the Retail Consortium.

# A guide to help you in the garden

## Caring for your lawn

The choice of lawnmowers is becoming more and more complex, as manufacturers develop and refine existing technology. Below we have outlined two key factors which you should consider before you purchase your equipment from Argos.

### Power Choice

**Petrol**  
The key benefit of a petrol-powered mower is the freedom it gives you - you are not constrained by proximity to power points. A petrol engine generally provides greater power than an electric motor and will be more suitable for large gardens.

### Electric

Electric mowers are lighter to use, cheaper to buy and offer you speed and convenience. Power output is measured in watts and as with petrol engines, the larger the motor the bigger the power output.

### Choice of Cut

There are two basic methods by which mowers cut - Rotary and Cylinder. Rotary blade mowers come in two types - wheeled and hover.

### Rotary Cut

Wheeled rotary blade machines are available in a range of sizes suitable for most gardens. Most collect the grass, and can cut close to the edge of the lawn. Most have rollers to stripe the lawn and some of these mowers are self-powered so that you do not have to push the mower as you walk. All our Hover mowers are electric, easy, light and flexible to use. They

operate by literally hovering just above the ground as they cut. There are 3 types of hover mower, ones which simply cut the grass, ones which cut the grass and collect it and ones which stripe the lawn as well as both cut and collect the grass.

### Cylinder Cut

This is the traditional English way of striping your lawn. Variable height blades positioned at the front of the mower allow you to cut right up to the edge of your lawn - giving you a neat finish.

## Garden Tools

**Grass trimmers** cut grass around the areas inaccessible with a lawnmower, ie close to walls, around trees etc. They work by having a length of nylon line spinning at speed, which cuts the grass.

**Hedge trimmers** are purpose built to keep your hedge looking perfect; they work by way of a 'scissor' action with the blades moving rapidly back and forth.

## Garden Shredders

These products mulch your garden waste - leaves, grass cuttings, small branches etc, into a smaller size, enabling good compost to be produced much more quickly.

Together with **ROOFW** we have identified some key safety tips you should follow in the garden.

- ▲ Always follow the manufacturer's instructions very carefully.
- ▲ Always fit a Residual current device (RCD) to the electric socket. This disconnects the electric circuit if there is a fault (order 982/1321).
- ▲ Never use an electric mower in the wet and do not attempt to lift the mower whilst the blade is rotating.

# A guide to choosing your power drill

## Choosing your power drill

**B**uying the right tool for the job can be the key to successful DIY and home improvements. So to help you choose the correct tools for your needs we've tried to explain some of the more common technical terms in this catalogue. With a comprehensive range of power tools and DIY equipment available from our catalogue you can be sure that whatever you need to do, Argos takes care of it.

### Power Drills and Screwdriver Features

#### Input Wattage

The power of the motor in your drill is measured by "input wattage". For tough heavy duty jobs, or frequent and prolonged use, a drill with a high rating is an important point to look for.

#### Chuck Size

The chuck size refers to the diameter of drill bit shank which can be put into the drill.

#### Speed

Varying materials and hole sizes require different speeds and power. At Argos we have a range of drills from the basic single speed drill to the most technically advanced.

#### Single Speed

For straightforward drilling into wood, metal, and plastic, a single speed drill may be suitable.

#### Two Speed

Drills with two speeds allow greater flexibility in drilling through hard or soft materials. A two speed drill will also allow you to select either fast or slow speed measured in RPM (revolutions per minute). The higher the RPM, the faster the rotation of the drill.

#### Variable Speed Drills

If you want more control and precision a variable speed drill may be suitable. It will allow you to tackle a variety of tasks in different substances and sizes with greater accuracy than the two speed drills.

Remember always read the manufacturers' instructions when using variable or two speed drills.

#### Reversing

A useful feature which allows the drill to rotate in the opposite direction to normal. This is handy for screwdriving or removing a sticking drill bit.

#### Hammer Action

For tough jobs like masonry or concrete drilling. A drill with a hammer action literally "hammers" the drill bit into the wall (thousands of times a minute), as well as rotating it.

#### Torque Control

Drills with torque control continuously monitor the "resistance" to the drill bit. This means that if you suddenly encounter an impenetrable area, the drill will stop rather than risk damage to itself. Torque control is particularly useful if you intend using your drill as a screwdriver.

### Cordless Drills & Screwdrivers

Cordless drills and screwdrivers are growing in popularity - not surprisingly, as they offer many of the benefits of mains drills without the need to work close to a power point. As they are driven by a rechargeable battery, it means that you can work in the garden or up a ladder and not be hampered by a mains lead.

Cordless drills can be used in the same way as the mains drills described earlier. They can still be used to drill holes into wood, metal or plastic, as well as giving you greater freedom to move around the house. Many drills can act as screwdrivers too, as long as they have variable speed and reverse facility.

### Cordless Drills & Screwdriver Features

#### Trickle Charge

The batteries are charged slowly while the tool is not in use (ie overnight). They can be left on continuous charge with no harm to the batteries, so the tool is always ready for use.

#### Fast Charge

The batteries can be charged in approximately one to three hours depending on specification (but cannot be left on charge permanently).

#### Voltage

The higher the voltage of a battery the more power the drill has for tougher jobs.

#### Removable Battery

A rechargeable, removable battery allows greater flexibility and continuous use, as a second battery can be charged whilst the drill is in use.

So whatever your needs are for DIY, Argos takes care of it.

For any queries about your drill ring the appropriate telephone number during normal office hours.

Black & Decker Service Technical Department 0753 500779

We have spoken to the Royal Society for the Prevention of Accidents and jointly we have put together the following safety advice to remember when using power drills.

#### ⚡ RoSPA Power Drills Safety Advice.

- ▲ Always read the manufacturer's instructions before starting work. If you lend equipment, make sure that the user reads the instructions for future reference.
- ▲ Always fit a power breaking device to the electric socket before using a power tool. This disconnects the electric circuit if

there is a fault (order Cat. No. 982/1321).

- ▲ Wear safety goggles for most DIY activities.
- ▲ Use good quality sharp bits in the drill and make sure they are secured firmly in the chuck.
- ▲ Don't leave cables trailing over the edge of the work surface. When the job is finished, put the drill away.

# A guide to help you keep fit

## Stay in shape at Argos

Our range of equipment, which is one of the best in the High Street, will enable you to exercise when it suits you, and in your own home, so that you can fit your exercise into your own lifestyle. Whether you're looking for light exercise or for something more "serious", at Argos, we know how to take care of it.

We have equipment to develop strength and stamina for men and women of all ages for beginners and for experts.

### Strength Training

There is a variety of keep fit equipment available at Argos which primarily helps to build up your strength.

**Weights and Benches** are the simplest way to increase your strength. With weights you can use **weights** to increase your strength depending on the type of exercise you want to do. If you use a bench in conjunction with a set of weights it will allow you to develop your own training programme.

**Multi-gyms** are the most comprehensive fitness and body building machines for developing your muscles. They are fully adjustable so that you can progressively increase and decrease the weights and resistance on them. Our multi-gyms will suit everyone, whatever your age, sex or level of ability.

### Stamina Building

If you are looking to build up your stamina through exercise then have a look at our range of **Exercise Bikes** and **Rowing Machines**.

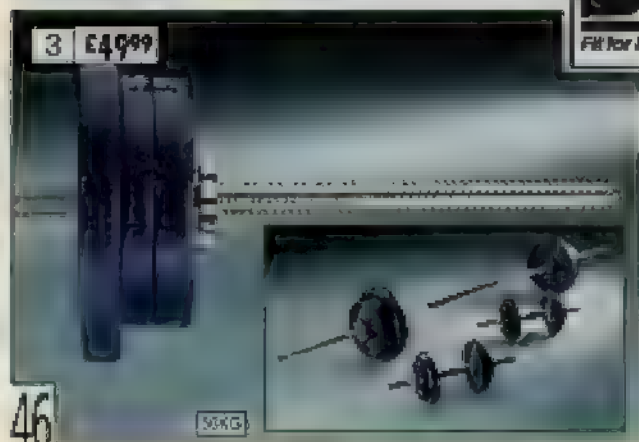

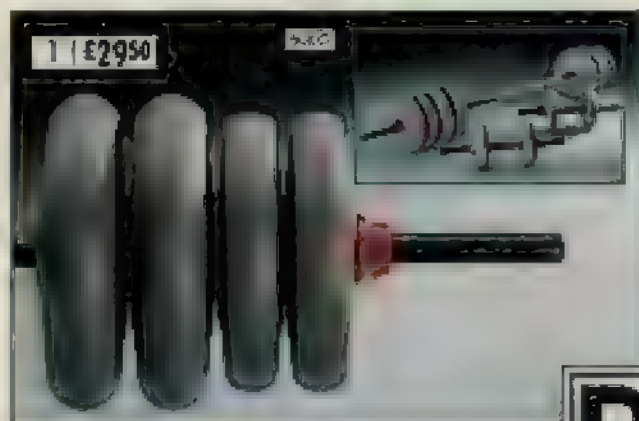

**Exercise Bikes** help to build up your aerobic capacity and are particularly good at helping to tone up the muscles in your buttocks, hips, thighs and legs.

The latest dual action cycles have adjustable pivoting handlebars and these enable you to pedal and row exercising the upper and lower body at the same time.

**Rowing Machines** are the single best machines for all round exercise by strengthening your legs and exercising your upper body.

**Treadmills** are similar to jogging and walking and are renowned as one of the most intensive work-out machines.

Now we've given you some key tips on keep fit equipment have a look through the catalogue to see our full range and let Argos take care of it.

# a guide to choosing your bed

**A**t Argos we offer a comprehensive range of beds which provide a high standard of quality and comfort at affordable prices.

Our range covers most types of beds and mattresses available, from single to double divans with storage and foldaway visitor's beds. When

choosing your bed the combination of mattress and base play an important part.

**Airsprung**

Made with individually tempered

springs and spring units. These units are covered with a unique bonded natural coil fibre insulation pad called

'Flexor' which virtually eliminates spring feel; softer upholstery layers are then added to increase overall comfort. A deep quilted finish maintains a constant high level of comfort to the total sleeping area.

'The Ultimate Sleep System' The unique springing system has continuous support spirals which provide support right to the edge of the bed, maximizing the sleeping area and eliminating roll-off. Unique head to toe spirals prevent partners of unequal weight rolling together. The mattress and base have posture zones

to provide maximum support where body weight is greatest.

Extra deep mattress with orthopaedic

spring system and made to Silenight's exacting standards.

Traditional coil springs form the basis of the mattress.

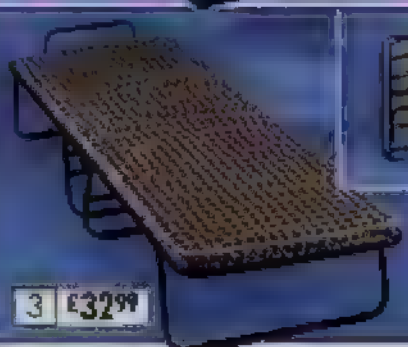

Natural layers of upholstered materials are matched to a 'breathing' natural fibre insulator. The tailored outer cover, made from a durable printed fabric, is placed on top to complete the mattress and base unit.

If you have any queries about the  
installation of the Showerforce  
Power Shower please ring the  
Electrical Department on 05 36-  
400177.

**16. SHOWERFORCE SF 2000 POWER**  
SHOWER. A quietly powerful shower pump  
which gives you the pleasure of  
a quietly hot shower. This gives something  
no conventional electric shower can, a  
choice of four shower patterns to suit all  
the family. Programme the showerhead  
for invigorating spray, soothing pulsate,  
luxuriously bubbly champagne, or gently  
massaged flow for the little ones. Ideal for  
use with Economy 7 tariff, the  
Showerforce SF 2000 uses your stored hot  
water. There's also a temperature limit  
stop to prevent the shower water ever  
becoming too hot. Push-fit connections  
require no specialised equipment and full  
installation instructions come with the  
complete set. **Please note this is not a  
direct replacement for your  
unearthed electric shower.**

**DUAL CONTROL:** Some of the double underblankets featured have dual controls. This enables the two sides of the bed to be at different heat levels, according to personal need.

**HEAT LEVELS:** All our electric underblankets have 3 or more heat levels. The higher the number, the hotter the temperature.

**ALL-NIGHT USE - Under/Over Blankets:** We now feature a range of electric underblankets, B.F.A.B. approved, as suitable for all-night use, plus the normal full pre-heating facility. All our electric blankets have full over-heat protection.

**IRONING TABLES**  
There are a variety of different types  
of ironing table sold by Argos. The  
following rough guide may assist you  
in choosing the one suitable for your  
requirements.

**Aluminium soleplates** - The  
lightest portable surface for all  
basic requirements.

**Non-slick coated soleplates** -  
Such as Silverstone. Easy to iron with  
slide smoothly over fabric and are  
easy to clean.

**Enamel coated soleplates** - Such  
as Duraglide and Ultra-glide. Easy to  
iron with, slide smoothly over fabric.  
Stainless steel Chrome

soleplates - Attractive and easy to  
clean. Polished surface enables easy  
sliding by allowing iron to glide over  
fabric.

# A guide to choosing your microwave oven

## Choosing your Microwave

We sell a range of microwave ovens, with a wide variety of features. So, to help you choose, we have explained the key features below.

### The Benefits of a Microwave Oven

- Microwave ovens can be used for most types of cooking, for defrosting, and for reheating pre-prepared food.
- The main benefit is the speed with which they can cook; an average size jacket potato will take around 7 minutes. This also makes them cheaper to cook with and more energy efficient than conventional ovens.
- Food cooked in a microwave oven remains nutritious and tasty since the microwaves destroy very few of the vitamins concealed inside.

### Quality and Safety

All our microwave ovens conform to both British and International Electrotechnical Commission standards of safety. They are also appraised by our own Quality Control Department.

### How a Microwave Oven Works

Microwave energy vibrates the water molecules on the surface of the food to a depth of 2cm, at a rate of approximately 2 1/2 billion times per second. The resulting friction produces a large and rapid build up of heat. The centre of the food is cooked by 'conductivity', as the heat from the perimeter passes into the centre of the food by heat. This is why the centre of the food takes longer to cook and why standing time and timing are so important.

## Features Guide

Before you buy your microwave oven, think about the type and amount of cooking that you will be doing. Our features guide will help you to decide which functions would be most useful.

### Size

For family use, an oven of 0.9 cu ft or more will allow you to cook larger quantities. A smaller oven would be suitable for 1-2 people.

### Controls

All our ovens are controlled by either a manual dial or, for more accurate timing and programming, by auto touch controls. All have timers, automatically switching off the cooking cycle once cooking is finished.

### Output Power/Wattage

The higher the wattage, the more powerful the microwave oven, so the faster, or greater the quantities it will be able to cook.

### Turntables

All of our microwave ovens have rotating turntables to ensure that food is cooked evenly. Some have special 'boomerang' turntables which always return to the original starting position when cooking is finished - which is useful for removing handled pots from the oven.

All turntables are removable for easy cleaning.

### Multi-Stage Cooking Control

Some auto touch control models allow you to programme the oven to cook at different power levels for different lengths of time, in sequence - enabling you to defrost, cook and keep food warm until you are ready to eat, automatically.

### Auto Weight Defrost

Simply key in the weight and type of the frozen food and it will be automatically defrosted for you.

### Programmable Memories

Some ovens have a memory facility which enables you to store your most used sequence of defrosting, cooking or reheating.

### Delay Start/Timer

This allows you to delay the start of your cooking while you are out, so that your meal is ready when you return home.

### Grills

Some microwave ovens have grills which will brown and crispen your food, giving it the same appearance as conventionally cooked food.

### Points to Remember

Allow sufficient standing time after cooking for heat to pass to the centre of the food.  
If possible, stir or rearrange food halfway through cooking to ensure even cooking.  
Reheating of food must be carried out at a temperature higher than 70°C for at least 2 minutes.  
Always follow the microwave, oven food and manufacturer's instructions.

### Accessories

Always use microwave safe cookware and tableware, products marked by this symbol are safe to use with your microwave.

Please remember that metal containers and utensils cannot be used in microwave ovens.

## Extended Guarantees

All our microwave ovens have a 1 or 2 year manufacturer's guarantee, however for added peace of mind you can also take out an Argos Extended 3 or 5 year Guarantee.

For a small initial payment, you can insure yourself against future repair costs for your microwave oven. Pick up a leaflet or ask in store for details.

(The above guarantee does not affect your statutory rights.)

## Argos Personal Account

With an Argos Personal Account you can buy your new microwave now and spread the cost to suit your budget. Ask in-store or see our leaflet for further details.

Dishwashing machines provide a welcome relief  
from the task of washing up, however when  
washing cutlery it is advisable to remove the cutlery  
and wipe dry as soon as the dishwasher cycle is  
completed, as it is undesirable to leave the cutlery  
for any length of time in the damp atmosphere of a  
dishwasher.

It is not advisable to wash silver plated or wooden  
handled cutlery in a dishwasher.  
Sets are plain boxed unless otherwise stated.

Watches that are designated 100m water proof are suitable for wearing whilst water is being splashed but NOT under any pressure or swimming and showering.

Watches that are designated 100m water proof have been tested to 50 metres static water pressure whilst otherwise stated. These watches are suitable for wearing whilst swimming.

All quartz watches are dependent on batteries for their power source. Our suppliers adopt a policy of continuous improvement, hence there may be during the life of the catalogue, minor variations in models, specifications and colours.

For an up-to-date list of suppliers see page 226. Some of the watches on this page may need professional adjustment. This service is offered free of charge. Ask in-store for details.

### PHILISHAVE UNIQUE ROTARY ACTION

**NO ESCAPE CUTTING ACTION**  
Since hair grows in all directions, Philishave cutting heads have been designed with angled foil which can catch or bend hair to catch both long and short hairs.

**DOUBLE ACTION LIFT AND CUT**  
A unique piece of micro technology comprising a lifter and cutter that combine together with micro-precision, gently lifting, then cutting the hair inside below the hair line back into the skin.

**SELF-SHARPENING BLADES**  
The cutter blades are actually ground to a sharp edge and rotate at high speeds create "frazzling" shaving heads to give a very close and comfortable shave.

**Philishave Rechargeable**  
The powerful performance of a mains shaver returned for up to 2 weeks of cordless independence at home or abroad.

**Philishave Battery**  
Good grooming on the move for the travelling man. Keep in the car or office as a "top-up" for wet or dry shavers.

**Philishave Mains**  
Highly featured, powerful mains shavers for the ultimate close, comfortable shave every day.

# A guide to choosing your TV and audio equipment

## Televisions

If you are looking for a portable or large-screen television, Argos has a wide range for you to choose from with a variety of features. The key features are explained below to help you to make the right choice to suit your needs.

### FST

This stands for "flatter square tube" which gives you improved definition, a wider viewing angle and less light reflection.

### Teletext Fastext

This gives you up-to-date information on a wide range of subjects such as travel, news, sports and television programming. Teletext also gives you access to national television programmes.

Fastext is simply an updated system to give you quicker access to your chosen page of information.

### SCART Sockets

SCART leads can be used to connect your television to your VCR, audio system or satellite receiver dish.

### Sleep & Wake-up Timers

Particularly useful if you want to watch television in the bedroom, you can programme the timer to switch the television set off automatically, after you have fallen asleep. A wake-up timer also acts as an alarm clock.

## Video Recorders

The VCR unit is programmed by using the remote control handset. Some models have either an LCD display on the handset, or an on-screen display to aid programming. You can record one programme even if you are watching another on a different channel. The VCR can also be programmed to record a number of events over a period of weeks. A twin speed/stop play facility allows the VCR to record and then playback at half the usual operating tape speed. This effectively doubles the length of your tape, giving 6 hours of recording on a 4-hour tape, however the quality of the recording may not be quite as good as it is when recorded at normal speed. Playback facilities include fast forward and picture search to help you to find the programme you want to watch, and freeze frame for those special moments.

### Argos Extended Guarantee

To support our commitment to quality, Argos offers extended 3- and 5-year guarantees on televisions, VCR's and most of our audio range including radio/cassette players, hi-fi systems, personal CD's and car radio/cassettes. For a small initial payment, you can insure yourself against future repair costs for your television and audio equipment.

We are also giving FREE 3-year accidental damage cover on most TV and audio equipment.

Pick up a leaflet or ask in-store for details.

The above guarantees do not affect your statutory rights.

### Argos Personal Account

Spread the cost of your television and audio equipment with an Argos Personal Account. You can buy now and spread the payments to suit your budget.

# Audio Equipment

## Personal Stereos

Argos offers a wide range of Personal Stereos, both cassette players and radiocassette players for use inside and outside the home.

An anti-roll device on some stereos is useful to eliminate playback distortion if you want to use the unit whilst on the move.

Some also have Bass Enhancement to give extra depth to the music.

## Personal CD Players

All of our Personal CD players are supplied with either in-the-car or lightweight headphones for your personal listening pleasure, but can also be used with your home audio system or active speakers.

Additional features on some models may include a built-in radio, and rechargeable batteries.

A special connecting pack also allows some models to be used with your in-car radiocassette.

Please note that Personal CD players are not suitable for active situations.

## Midi, Mini and Micro Systems

Mini systems incorporate speakers, a tuner, amplifier, cassette deck and record player all in one. Some also have a CD unit and a remote control. Mini and micro systems give the same high-quality sound as midi-systems but are smaller and more compact.

## In-Car Entertainment

We sell a range of car stereos, from simple radio cassettes to CD players. Many of the functions on in-car stereos are similar to those on other

features include:

**Tuner** - on 4-speaker systems this allows you to adjust the balance of sound between the front and back speakers

**Auto seek tuning** - this is ideal for changing stations whilst driving. The radio automatically seeks out the strongest radio signal for you, so that you can concentrate on your driving.

**Radio Data Systems (RDS)** - this is designed to make road travel safer and more convenient. It displays the station name and maintains your chosen station even when travelling through different reception areas. Where traffic information is broadcast, this will automatically interrupt your listening with travel bulletins.

**Extractable units** can simply be slotted into place when in use and then easily removed when you leave your car.

## Fitting Service

When you have chosen your car audio system,

let Argos and Lucas take care of installing it for you. Operated by Lucas, our fitting service covers radiocassettes, CD's and speakers. Please ask in store for full details.

# Audio Features Guide

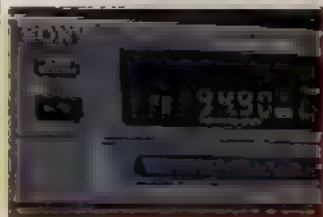

The advances in audio technology mean that many sophisticated features are available on both personal and portable equipment, as well as our mini and midi systems.

## Digital Radio Tuners

**Phase Lock Loop (PLL)** digital radio tuners seek out radio stations by searching the whole radio waveband automatically for the next strongest signal. They also allow you to move up and down the wavebands to seek a station manually.

## Pre-Set Buttons

Some tuners enable you to pre-select your favourite stations and record them in a memory. You can then recall them at a touch of a button.

## Dolby 'B' & 'C'

Dolby is a noise-reduction facility that reduces the hiss when tapes are played, especially on "quiet" music. Dolby 'C' is the enhanced version of Dolby 'B', giving even clearer sound reproduction.

## Continuous Play

Available with twin tape decks, this allows you extended playing time. The second tape automatically takes over when tape one has finished.

## Auto Reverse

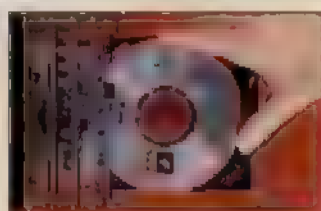

When one side of the tape has finished, the cassette player automatically plays the other side, giving continuous play with just one tape.

## High Speed Dubbing†

Available only with twin tape decks, this facility allows faster tape copying usually at twice normal speed.

## Graphic Equalizers

A graphic equalizer allows you to "shape" accurately the tone of the music being played by increasing or fading particular sounds. The graphic equalizer has a number of bands. The greater the number of bands, the more precise the equalizer. Some systems also have a spectrum analyser which provides a visual display of the sound level in the form of "dancing lights" enabling you to make fine adjustments to sound and tone levels.

## Compact Discs

Compact discs, or CD's, provide the most accurate sound reproduction available.

On CD midi systems, a search button allows you to select which tracks you want to hear. A memory facility allows you to programme a sequence of tracks in any order. Multipay CD players allow you to select tracks from up to 3 CD's at once.

## Turntables

Most midi systems have record turntables and belt-driven decks which ensure a constant rotational speed. Fully automatic decks place the stylus on the record for you, and return it after the record ends. Semi-automatic decks only return the stylus, you have to place it on the record yourself.

## Speakers

Speakers are an essential part of your stereo equipment - the better the speakers, the better the sound.

Within each speaker is a series of either 2 or 3 cones (known as "2-way" and "3-way" speakers respectively). 3-way speakers usually give a better quality of sound.

**Active Speakers** for use with personal CD's and stereos have their own power source to amplify the sound further.

## Music Output

The higher the number of watts the greater the capacity of the amplifier and the louder the sound will be. 2 x 20 watt music power means that there are 2 speakers with a maximum music output of 20 watt per speaker. Manufacturers generally express the potential maximum volume of an audio product in one of three terms. See comparison.

1w RMS = 2w MPO = 4w PMPO.

# A guide to business equipment

If you're building up your business, whether it be from an office or your home, you'll be looking for the latest types of office equipment. At Argos we now sell a wide range of business equipment from electronic organisers to the latest models of word processors and at affordable prices.

## Electronic organisers/digital diaries

Whilst providing a similar function to a calendar, these also act as miniature data management systems. They can hold information such as telephone numbers, addresses and daily schedules. The amount of information they can hold is dependent on the size of the memory, which can range from 8K to 256K. Some models also provide the facility for a much wider range of applications such as spread-sheeting, word processing, and language translations. This facility can be via a range of over 16 data cards which can also increase the memory size of your organiser. At Argos we offer a range of accessories and software for you to choose from through our Mail Order service - see below for more details.

Making the right decision over how to equip your office, however, can be difficult with a lot of technical information and features to understand. To help you with your choice we have explained within this guide some of the technical terms used in the catalogue.

## Typewriters

At Argos we have a range of typewriters from the most basic manual to a very comprehensive range of electronic typewriters. Below we have pulled out some key features on typewriters which will help to explain their functions to help you with your choice.

### Features Guide

**Correction Memory** enables you to correct up to three lines of current text so if an error is made you can simply relocate and delete it.

**Text Memory** is a facility which allows you to store information/text of varying amounts. This can range from 3 pages of text with a 6K memory to 12 pages of text with a 24K memory capacity.

**LCD Display (Liquid Crystal Display)** allows you to review and edit text easily on screen before printing.

**Justification** allows you to produce documents with the right hand margin blocked so that sentences are equally proportioned regardless of number of words hence giving a professional appearance.

**Spellcheck** facility alerts you to spelling mistakes and enables you to produce documents free from errors.

**Print Speed** This is measured in CPS (Characters Per Second).

**Typing Pitch** The pitch designation represents the number of characters that can be typed per inch.

**Decimal Tabulation** automatically positions the carriage for alignment of numbers at the decimal point.

**Word Processor features** - some typewriters have the ability to perform basic word processor functions, such as block move/copy/delete.

## Word Processors

Word Processors offer all the benefits of an advanced typewriter but with the additional features of larger displays and a bigger memory capacity. The memory can also be expanded by the use of an external 3 1/2" floppy disk or data storage card.

### Features Guide

**Block Copy/Move/Delete** provides you with the ability to move, copy or delete a block of text allowing you to edit simply and quickly.

**Search and Replace** enables editing of a specific word or phrase throughout a piece of text in one single operation.

**Address/Mail Merge** allows you to merge a list of names and addresses with a letter enabling you to provide personalised correspondence easily.

We have a wide range of business equipment available through our stores.

Remember, Argos Superstores carry a wider range than our Traditional Stores and many items are on display. See the back of the catalogue for a list of our Superstores.

So whether you're looking to equip your office or your home, let Argos take care of it.

To cater for all your needs, we also offer a mail order service for spare parts and accessories on calculators and typewriters. Simply call 061 927 7290 (24 hours) for credit card orders or alternatively pick up an order form from your Argos store. Your goods will be despatched free of charge.

# A guide to choosing your telephone and answering machine

## Telephones

Argos offers a wide range of telephones with a variety of different functions. To help you to choose the right telephone for you, we have explained the features available.

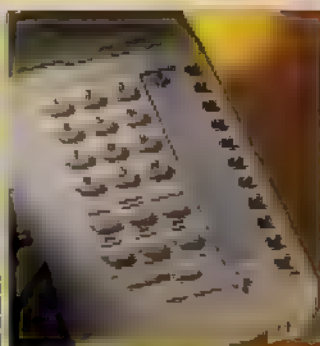

### Cordless Phones

Cordless phones allow you to receive or make calls in a variety of places around the home and even in the garden. You can also page the handset (or user) from the base unit. The base unit must be connected to a mains supply as well as an approved telephone socket. Batteries in the handset then recharge when the handset is replaced in the base unit. A battery back-up enables the telephone to be used during a power cut.

The quality of reception on your cordless phone is unlikely to be as clear as with a conventional unit, especially over long distances and between obstructions such as walls or doors.

Cordless phones are susceptible to interference from other cordless phones and radio transmissions, particularly when used from a distance. Cordless phones operate on 4 different channels - the channel number is marked on the box. If you experience interference, you will need to exchange the complete telephone unit for one with a different channel number. Dual channel telephones have 2 channel options so you can switch the handset and base unit to the alternative channel.

To get the best result, always follow all of the manufacturer's instructions.

### Telephone Features

#### Memories

Many telephones allow you to store your frequently used or important numbers, and recall them at the touch of a button, or two.

#### Mute (Search) button

This allows you to speak to other people in the room without being overheard by your telephone caller.

**On Hook Dialling/Hands Free Speech**  
"On Hook Dialling" enables you to dial without lifting the receiver. A speaker allows you to hear when the phone is answered, then you simply pick up the handset to speak.

"Hands Free Speech" is useful if you do not want, or are unable, to lift the telephone receiver - simply press a button and you can speak and listen with the receiver still in place.

#### Answer Only Option

The answer machine can play your message without taking the caller to leave a response. This is useful if you are away for several days.

#### Two-Way Conversation Recording

This allows you to record a telephone conversation, and can be useful when listening to directions or instructions.

#### Branch Phone Reset

If your answering machine is switched on, it will stop and reset automatically when you intercept an incoming call on another extension telephone.

#### Remote Message Retrieval

You can even check the messages on your answering machine while you are out. Using a Touch-Tone<sup>®</sup> telephone (which produces a variety of tones as you dial) or a remote control

#### Ring Equivalent Number (REN)

The number of telephones you can connect to a line is determined by the REN of each telephone. The maximum total REN for a telephone line is 4.

#### PABX

PABX compatible telephones can be used with most PBX exchange or switchboard systems. Please see the manufacturer's instructions, or use the helpline for further details.

#### Mercury

You can now use the "Mercury" network from your home via a British Telecom line. For a small annual fee you will receive your own PIN code giving you access to, on average, cheaper long distance and international calls. A "Mercury" button will allow one-touch dialling into the Mercury system. Other "Mercury compatible" telephones enable programming of the sequence into a normal memory. Please phone the Mercury Helpline, 0800 424 194 for further details.

#### BT Network Services

British Telecom digital exchanges will soon cover most of the country, giving clearer lines and faster dialling. If you have a dual signalling (Pulse/Tone) or Touch-Tone<sup>®</sup> telephone, you will also be able to use the new BT "Network Services" including call diversion, 3-way calling, and reminder calls. These additional services are available from BT for a quarterly rental charge. Contact your local BT office for further information.

\*Correct at time of going to press.

\*Touch-Tone is a BT registered Trade Mark.

All Argos telephones and answering machines need a plug-in socket. If you don't have this type of socket contact British Telecom and enquire about conversion.

## Answering machines

An answering machine will record your messages for you. Many also include a telephone handset to make normal outgoing calls. Both have a wide range of features to choose from.

To install your machine you need a 15 amp mains socket near to a plug-in telephone socket. You may also need a telephone socket doubler to connect the answering machine alongside your telephone. A combined telephone and answering machine will simply replace your existing telephone.

### Answering Machine Features

**Call Monitor/Screening/Interception**  
This allows you to listen whilst the answering machine takes your call and choose whether to answer personally.

#### Message Facility

You can leave a message on your answering machine for someone else to access on their return.

device, you can activate your answering machine to play back any recorded messages. Some machines can also execute other remote functions such as changing the outgoing message.

#### Digital Voice Prompt

A digital voice will guide you through the various operations, and give you information such as the number of messages received.

#### Call Count

A call count facility displays how many messages have been recorded for you, usually on an LCD panel or by a flashing neon light.

#### Day/Time Stamp

This records the exact time and day of all incoming messages.

# A guide to choosing your camera

We have a wide selection of cameras, with a range of features to help you to get the best from your photography.

Polaroid cameras use special "instant" film so you can see your photos within minutes of taking a picture.

## Features Guide

Most cameras are fitted with additional features to give greater flexibility when taking photographs.

### Flash

A built-in flash works directly off the camera batteries, and is usually effective for up to 18 feet.

An Auto/Sensor flash works automatically when there is insufficient light. On some sophisticated cameras, a sensor flash can be turned off for atmospheric shots, or used as a "fill-in" flash on shaded objects.

Red-eye Reduction flash is useful when photographing people in low light conditions. A pre-flash contracts the subject's pupils to avoid "red eyes".

### Motor Drive

**Motorized Load** will automatically advance the film to the first frame ready for use.

After each shot, **Motorized Advance** automatically winds the film on to the next frame.

At the end of the film, **Motorized Rewind** will completely rewind the film ready to take out.

### Auto Focus/Focus Lock

Basic cameras have fixed focus, which does not vary depending on how far away the subject is.

Cameras with auto focus automatically focus on the subject in the centre of the viewfinder. "Focus lock" allows you to focus on your subject and then recompose the shot, still holding your subject in focus.

110's are lightweight, with a film which simply slots into the back. They have a telephoto lens, and built-in flash for indoor use.

35mm Compacts range from a basic level, similar to 110's, to sophisticated models with many additional features. They have a higher quality lens and use a 35mm film which gives better results.

### Auto Exposure

The shutter speed is automatically adjusted to give the right exposure for the existing light conditions.

On more sophisticated cameras a backlight compensation allows for bright backgrounds.

### Self Timer

This allows you to set the camera to take a photograph approximately seven seconds later, so that you can be in the shot as well! A dual self timer takes two pictures in succession, whilst a special multi-frame self timer allows you to take up to four consecutive shots.

### Zoom Lens

A zoom lens allows you to bring the subject closer and frame the shot as required without having to move. The bigger the zoom (measured in millimetres) the nearer the image, and so the larger it will appear.

### Macro Facility

This allows you to take close-up shots, nearer than the usual minimum focal distance of the camera.

### Wide Angle

A wide angle lens allows you to fit more into a particular shot, such as landscapes or large group photographs.

### LCD Panels

On sophisticated cameras, these show the current function status, for example, the selected flash and focus mode, battery level, and how many pictures have been taken.

### EX Coding

The camera will automatically adjust depending on the speed of film you use.

A composite image. The main part shows a man from the chest up, wearing a black t-shirt with 'BLACK &amp; DECKER' printed on it. He is holding a handgun. To the left, there is a separate, smaller image of a handgun. At the bottom, there is a small box containing the number '2' and a larger box containing the number '59950'.

2. The first step in the process  
 is to identify the problem or  
 issue that needs to be addressed.  
 This can be done by conducting  
 research and gathering information  
 from various sources. Once the  
 problem has been identified, the  
 next step is to develop a plan  
 of action. This involves setting  
 goals and objectives, determining  
 the resources needed, and creating  
 a timeline for completion.

3. The first step is to identify the main topic of the document. This is usually found in the title or the first paragraph. In this case, the main topic is "The Role of the Teacher in the Classroom".

**B Showerforce Mirage Power Shower** Saving twice the water and pressure of conventional gravity showers and twice the flow - the Showerforce Mirage offers you far more choice of shower experiences. A unique electronic flow controller allows you to set the flow, while a twin action showerhead gives you the choice of 3 shower patterns, from gentle spraying to the full power spray. The unit splits the water from both the cold water system and the hot water tank, and gives you infinitely variable set point temperature control via a sophisticated micro valve. Fluid connectors, requiring no specialised equipment, and full installation instructions come with a comprehensive list of showerhead, rail, hose and soap dish. Cat. No. 830/8388 £129.99

## NICAM

Nicam (Near Instantaneous Compounded Audio Multiplex) sound is a revolutionary high quality stereo digital audio signal which is transmitted simultaneously with television pictures giving a similar sound quality to compact disc. Your television or video must incorporate a NICAM "board" which will pick up the signal through your existing TV signal.

By the middle of this year, Craggelly, Heathfield, Stoddard Hill, Sudbury, Tackolleston and Vvaltham transmitters and relay stations will be available on NICAM with the remaining transmitters and their relay stations being added during 1993.

The TV sets featured on page 533 and item nos 4 and 5 on page 534 will receive the NICAM signal and offer you the benefits of greatly enhanced sound quality to your listening and viewing pleasure.

Television Sizes

Television sets have always been described by the nominal size of the glass tube across its greatest diagonal. The figures shown in brackets eg (134cm) refer to the actual viewable picture diagonal for PST sets which are normally quoted in cm. We have rounded to the nearest inch for ease of comparison. All products on these pages come complete with stand.

# A guide to business equipment

**Argos - The Complete Business Centre.** As well as our range of typewriters and word processors available through our normal Argos stores, we have a more extensive range of equipment sold exclusively through our Superstores.

## Computers

Computers are an excellent source of education as well as entertainment. Increasingly, schools are introducing computer studies to children at an early age.

**Basic Home Computers** comprise of a keyboard with an integral microprocessor and disk drive. These computers tend to be used as games machines.

**Personal Computers (PCs)** are more refined, comprising a central processing unit with integral disk drive, keyboard and monitor. The speed in which a Personal Computer processes information is determined by its level of megahertz (MHz). The higher the MHz, the faster the computer processing.

From computers to fax machines, we have everything you need to equip your office. As these can be quite technical products, we have provided some more information to help you with your choice.

### Memory

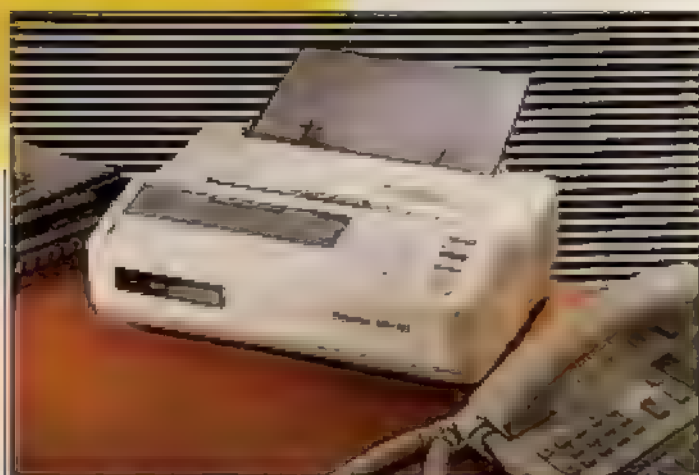

The size of a computer's memory is judged by the quantity of information it can hold. This is normally measured in megabytes (1 Mb = 1 million bytes).

**The Random Access Memory (RAM)** is the working memory of the computer which is utilised when it is in operation. Information which is held in the RAM is lost when the computer is switched off, therefore this needs to be stored on hard or floppy disks depending on machine.

A **Hard Disk Drive** has a high capacity to store information. This is usually located within the body of the machine.

**Floppy Disks** enable you to store information externally from the computer on small 5 1/4 inch or 3 1/2 inch disks, the use of which is dependent on the size of the disk drive. The amount of information that can be stored depends on the size and density of the diskettes.

At Argos we sell a range of Floppy disks which are suitable for use with all our computers and word processors - see pages 301 and 339 for more details.

## Fax machines

If you run a small business, a fax machine is an ideal way to keep in touch. By simply plugging the fax machine into a new style phone socket and the mains, you can be connected to thousands of businesses throughout the country. Fax machines are now very compact, so can fit easily into your home or office. They are also very cheap to run costing the same rate as a telephone call.

Some machines contain an internal fax switch which will detect and then divert the call to either the fax or a telephone. If you wish to use your fax in conjunction with extension phones or an answering machine, you will require a more highly featured stand alone fax switch.

### Features Guide

**Multi-Tone Reproduction** produces shades of grey and not just black and white, giving greater clarity for photographs or brochures.

**Superfine Mode** allows for a better reproduction with the facility for fine print and detailed drawings.

**Auto Document Feed** lets you set up to 8 pages for automatic transmission or copying in sequence.

**Activity Report** provides a summary of information transmitted and received.

We sell fax paper through our Mail Order service, see below for more details.

We now have available through our Superstores a small selection of the latest models of fax machines which can help to solve all your communication problems quickly and easily. So if you want to stay in touch, let Argos take care of it.

## Printers

The most common printer used now with word processors and computers is the Dot Matrix. Recently ink jet printers have become more popular. We have outlined the key differences to help you make the right choice.

### The Dot Matrix Printer

These printers are widely used. They work very simply by creating an image on the

paper using a row of 9 or, in the more expensive models, 24 pins. The pins strike rapidly on to a ribbon and through to the paper. A 24-pin printer is able to create a much smoother outline for letters and graphics since it uses more "dots per inch".

### Ink Bubble Jet Printers

This works in a similar way to the Dot Matrix Printer, however the main difference is the use of an ink jet. An ink jet is activated by a pump or, in the case of a Bubble Jet Printer, by heat creating steam pressure in the ink tube. This forces the ink on to the paper creating the image with Near Letter Quality (NLQ) print. One of the key benefits of these printers is the fact that they are very quiet when they print.

### Features Guide

#### • DPI (Dots Per Inch)

This refers to the density of the print, the higher the DPI, the higher the density of the print.

#### • Variable Print Speed

Most printers come with variable print speeds, the faster the speed however, the less definition is given to the print. This is measured in CPS (Characters Per Second).

#### • Typestyle/Typefaces

This is particularly useful if you like to change the presentation of your work. These can vary from italic and condensed typestyles to Roman and Sans Serif typeface.

#### • Friction Feed Facility

Enables you to handle single pages through the printer whereas the pull

feed tractor facility handles a continuous supply of paper.

#### • Buffer Memory

Enables you to store information being transmitted from the PC ready for printing.

Printer leads and accessories are available through our Mail Order service.

# A guide to choosing your camcorder

If you want more than just a photograph, a camcorder allows you to capture the complete action in sound and vision. Camcorders give high quality home video recordings and have a wide range of features to give you greater flexibility and improved photography. To help you to make the right choice, our guide below helps to explain the technical terms and features.

## Tapes

There are 2 camcorder formats using different types of tape. 8mm tape is a small cassette which gives up to 90 minutes recording, or 3 hours with long play facility. Tapes are played back by plugging the camcorder directly into your TV or video recorder using the leads supplied. Recordings can be edited on to VHS tape via a video recorder. VHS-C is a compact tape which can be played in your VHS video recorder, using the special adaptor supplied with all of our VHS-C camcorders. Tapes can also be played back by connecting the camcorder directly into a TV or video recorder 21 pin SCART socket. If you do not have a video recorder or 21-pin socket TV, you will need to buy an RF lead and adaptor available from Argos Mail Order Services (see page 312). VHS-C tapes give up to 45 minutes of recording, which can be extended to 90 minutes with a long play facility.

## Features Guide

### Power Zoom

A power zoom gives a smooth zoom-in action for close-up shots. The greater the zoom, the greater the magnification.

### Full Range Auto Focus

This ensures that the subject stays in focus, no matter how close or far away you are.

### Intelligent Auto Iris

This auto focus facility works through the lens to give clearer shots and a better colour balance.

### Macro

A macro facility allows clear and focused close-up recordings.

### Shutter Speed

A variable shutter speed allows slower speeds in low light conditions, whilst a high-speed shutter gives clear shots of high-speed action.

### Lux Illumination

The lower the lux minimum illumination, the lower the light conditions in which the camcorder can still effectively record.

### Fader

A fader allows you to fade smoothly in and out of different shots.

### Flying Erase Head

When recording over an old recording this gives a cleaner transition from old to new recordings.

### Title Memory

You can superimpose titles or dates on to your recordings.

### Age Insert

By entering your child's birth date, you can have an on-screen display of his/her age on future recordings.

### Edit/Camera Search

You can view previous recordings through the camcorder for editing or to find the correct position to resume recording.

### Insert Edit

This allows you to insert a new recording between existing scenes.

### Remote Control

Some camcorders have a remote control for use when playing your recordings through your TV or VCR. This allows you to play, pause, fast forward and rewind the tape in the camcorder.

## Extended Guarantees

Argos 3 and 5 year Extended guarantees are available on all our camcorders. See page 4 or pick up a leaflet in-store for details.

## Telephone Helplines

For any queries about your camcorder please ring the appropriate helpline during office hours.
